# People with Disabilities and COVID-19

COVID-19 is a virus. Some people with COVID-19 feel fine, but some feel bad and others get very sick.

People with disabilities and health problems can get COVID-19 and get sick.

People with diabetes, heart problems, cancer, and obesity can get very sick from COVID-19.

COVID-19 vaccines help keep you from getting COVID-19. They also keep you from getting very sick.

When you get the COVID-19 vaccine, you help yourself and other people from getting very sick.
