Protecting Yourself Against COVID-19 Protects Everyone

Close contact while spending time with others increases the risk of getting and spreading COVID-19. This is why it is so important to get the COVID-19 vaccine.
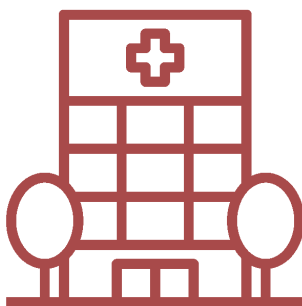

Getting the vaccine keeps everyone safe. Not only do you protect yourself when getting the vaccine, but also the people you live and work with.

As more people become vaccinated, schools, businesses, and stores can fully reopen without mask mandates. We will be able to go to events like football games, farmers markets, and concerts without restrictions.

You may have questions about the COVID-19 vaccine, and that's okay! Remember that knowledge is power. Gather the facts from a source that shares accurate information.

Accurate information on the COVID-19 vaccine comes from academic and medical organizations. Be sure to check dates on information you read and watch to make sure it is recent.
